ABOUT ME

Final-year BS Software Engineering student at University of Mianwali with strong expertise in Full Stack Web Development and Python programming. Skilled in building dynamic and scalable web applications using Django, JavaScript, and PostgreSQL. Currently developing an AI-powered interview coaching system as a Final Year Project. Passionate about problem-solving, backend logic, and AI integration.

EDUCATION

BS Software Engineering

University of Mianwali

TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript, Bootstrap 5, Figma, Canva
Backend	Python, Django, PHP (XAMPP environment)
Database	SQL, PostgreSQL, MySQL
Programming	C++, Python
Tools & IDEs	XAMPP, VS Code, Git, Figma
AI/NLP	Whisper, Spacy

PROJECTS

Vocal View – AI Interview Coach

Tech Stack: HTML5, CSS3, JavaScript, Web APIs

Developed a responsive AI-based mock interview web application with webcam integration, customizable job-based questions, and performance tracking. Implemented modular front-end architecture, local storage for session persistence, and a user dashboard to monitor interview history, scores, and skill progress.

Resort Management System

Tech Stack: HTML5, CSS3, JavaScript, PHP, MySQL, XAMPP

Built a full-stack web application for managing resort operations with features including room booking, food ordering, user authentication, and admin management. Developed a responsive frontend with a PHP/MySQL backend to handle bookings, customer records, and administrative controls efficiently.

DaSi IceCream – Full-Stack Web Application

Tech Stack: Python, Django, Bootstrap 5, HTML5, CSS3, JavaScript

- Developed a complete e-commerce web application for a premium ice cream brand with dynamic product categories, session-based cart system, live search, and multi-page checkout flow.
- Redesigned the entire frontend UI/UX using Bootstrap 5, custom CSS animations (AOS, keyframe transitions, glass morphism), and a curated pastel color system.
- Maintained clean separation of frontend and backend with Django template syntax, URL routing, and context variables intact throughout the redesign.
